

Brunonia australis

Blue Pincushion

(Seeds of South Australia)

(Seeds of South Australia)

(Krygsman, G, iNaturalist Australia)

Form: Groundcover **Height:** 0.1 – 0.3 m **Spread:** 0.1 – 0.3 m **Flowers:** Blue **Type:** Ball **Flowering time:** Spring, Summer

Ecological functions:

Soils: sand, clay or loam; acidic, alkaline or neutral

Germination rate: 3 to 5 weeks

Seed collecting: cut off maturing fruits. Fully dry in sunny position. Seeds can be easily extracted. Store in a container until needed.

Seed treatment: none

Sowing requirements: sprinkle seeds over bush sand or propagating mix. Lightly cover with fine gravel. Sow from early Winter.

Position: full sun, part shade

Supplementary watering: minimal

Uses: as an accent plant in mixed beds or as a ground cover. Ornamental, plant in drifts for a showy display. Nectar acts as a food source for native butterflies.

Notes: this species has a short life span of 3 years.
