

Acacia notabilis

Notable Wattle

(Fagg, M, Australian Plant Image Index)

(Murfet, D, Seeds of South Australia)

(Fagg, M, Australian Plant Image Index)

Form: *Large shrub* **Height:** *3 – 6 m* **Spread:** *3 – 4 m* **Flowers:** *Gold* **Type:** *Globular* **Flowering time:** *Spring, Winter*

Ecological functions:

Soils: *sandy, clay or loam; alkaline or neutral*

Germination rate: *4 to 6 weeks*

Seed collecting: collect mature pods that are turning brown, with hard, dark seeds inside.

Seed treatment: place seed into a container and pour on water that has just been boiled. Soak overnight. Remove and sow immediately.

Sowing requirements: cover seed to its own depth with damp soil and firm gently. Then cover with a layer of gravel. Sow in late Spring-Summer.

Position: full sun, part shade.

Supplementary watering: minimal

Uses: a low maintenance ornamental shrub. Commonly used as a background plant in mixed plantings, or as a barrier, wind-break and for soil control.

Notes: written approval is required prior to planting in streets or roads. It should not be planted closer than 2 m to any sewer main or connection.
