

Acacia rupicola

Rock Wattle

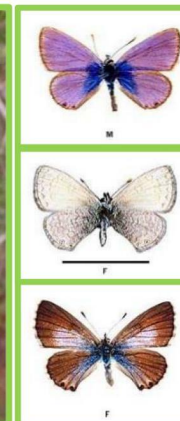

(Cox, G, iNaturalist Australia)

(Fagg, M, Australian Plant Image Index)

(Cox, G, iNaturalist Australia)

Adult male (top) and female (middle & bottom) Two-spotted Line-blue butterflies

(SA Butterflies & Moths)

Form: Medium shrub **Height:** 1 – 2 m **Spread:** 1 – 1.5 m **Flowers:** Cream **Type:** Globular **Flowering time:** Spring, Summer

Ecological functions: 

Soils: rock, sand, clay or loam; alkaline or neutral

Germination rate: 4 to 6 weeks

Seed collecting: collect mature pods that are turning brown, with hard, dark seeds inside.

Seed treatment: place seed into a container and pour on water that has just been boiled. Soak overnight. Remove and sow immediately.

Sowing requirements: cover seed to its own depth with damp soil and firm gently. Then cover with a layer of gravel. Requires well-drained soils. Sow in late Spring-Summer.

Position: full sun

Supplementary watering: minimal

Uses: commonly used for understorey in dry shady situations or rocky areas. Suitable for highway verges, batters, wide median strips, parks and reserves. Food host to Two-spotted Line-blue butterfly (*Nacaduba biocellata biocellata*) caterpillars.

Notes: not recommended to plant closer than 2 m to any sewer main or connection.
